

Day 8

Assignment

Note: Create function to solve these assignments.

1. Write a program to print the value of array elements using pointer and subscript notation.
2. Write a program to swap the two numbers using pointer.
3. Write a program to remove all the leading and trailing blanks from a string using pointer.
4. Write a program to find the length of string using pointer.
5. Write a program to copy a string to another string using pointer.
6. Write a program to concatenate the two strings using pointer.
7. Write a program to compare the two strings using pointer.
